A message from our CEO

The Canterbury West Coast Air Rescue Trust (CWCART), a registered charity, has been in operation for over 35 years. The Trust works closely with GCH Aviation, the service operator for 40 years, to provide funding to help support operating costs. While the Trust raises significant funds to support the delivery of the service, it also fills other critical roles. Above all, the Trust is dedicated to improving patient outcomes. Representing the communities we serve, the board and Trust work with GCH Aviation to raise the bar and provide the best service possible. We strive to be a world leading service as we know how important the role of the rescue helicopter is in New Zealand; it can be the difference between life and death.

In taking a moment to reflect, upgrades over recent years have included the introduction and upgrades of Night Vision Goggles (NVGs). Now, with over 30% of missions after nightfall, it seems unimaginable that in years gone by we simply couldn't respond to many nighttime emergencies. We have moved from a single engine squirrel on the West Coast to a BK117, and provided advanced clinical training and equipment such as life monitors, ultrasound and mechanical CPR.

The last 12 months have been unprecedented, with the most significant planning period for the service in the last 30 plus years, and we have some very exciting changes on the horizon. We are mid-way through MISSION 2026 which is a complete upgrade of all the rescue helicopters from BK117s to H145s. This is the biggest upgrade we have ever undertaken and will lead to a

number of other improvements for our patients, including the roll out of Instrument Flight Rules (IFR). Without the support from our community, we would not be able to take these huge steps forward with GCH Aviation. Find out more about the impact of this funding, and plans for 2025, in this report.

Our principal sponsors also play a critical role in supporting the rescue helicopters, Westpac in the Canterbury region and ROA Mining across the West Coast. Together, with Air Rescue and Community Services they provide essential funding that contributes to keeping these services going. However, even with their generous support, we rely heavily on the goodwill and generosity of our community.

Every donation to the Canterbury West Coast Air Rescue Trust is an investment in saving lives. For people in urgent need, the rescue helicopters are often the difference between life and

death, especially when every second counts.

Each mission flown is a testament to the power of generosity.

In the remote and rugged regions we serve, access to life-saving care would be impossible without this service. From critically injured accident victims to patients requiring emergency medical transfers, your support ensures help is always available, no matter the challenge or terrain.

Together, we can save lives and provide hope to those who need it most. On behalf of every life touched by your generosity, thank you for making such a profound difference.

Christine Prince
Chief Executive Officer

INVESTING IN THE FUTURE:

The Launch of MISSION 2026

As our rural population ages and the healthcare system moves towards a 'hub and spoke' model of centralised specialist services, the demand for the rescue helicopter service has increased.

Using the New Zealand Treasury's Better Business Case Framework we identified four critical areas of need, or pillars, that are proven to make a significant difference in improving patient outcomes and enhancing the rescue helicopter service for Canterbury and the West Coast:

- 1. HELICOPTER FLEET UPGRADE**
- 2. FULL IMPLEMENTATION OF INSTRUMENT FLIGHT RULES (IFR)**
- 3. HIGHLY ADVANCED MEDICAL EQUIPMENT IN EACH HELICOPTER**
- 4. WORLD-CLASS TRAINING FOR CREW AND PILOTS**

Together, these pillars form the foundation of our MISSION 2026 campaign.

In April 2024 we launched the MISSION 2026 campaign with an ambitious goal, to raise an

additional \$1.4 million by the end of 2026. This additional funding will support GCH Aviation, the service operator, to meet the financial demands of these essential pillars. Collectively, these enhancements will substantially improve patient outcomes and increase the rescue helicopters' response capability by 20-30%. This ensures we are better prepared to meet the growing and changing needs of our communities.

Since our launch in April, we've made significant progress towards our goal and have allocated over \$800,000 to MISSION 2026.

We are very grateful to the Urquhart Family Trust who donated \$500,000 to MISSION 2026 alongside their donation to a specific Instrument Flight Rules project to train the rescue pilots.

The support of the community has been outstanding, and we are anticipating further donations from businesses, individuals, and community-driven initiatives throughout 2025. We would like to extend our thanks to our generous 2024 donors: Adamson & Holland, ANZCO Foods Limited, Ashburton Menzshed, C. Tubb, Lions Club of Hinds & Districts Inc, Lions

Club of Mayfield & Districts, Logic Wireless Ltd, M. Shewan, Mayfield Central Presbyterian Trust, St Vianney's Timaru Trust, Tait Communications, Lodge Aorangi Timaru No 196.

The fleet upgrade is progressing smoothly, with the first of the H145 helicopters set to arrive in August via air freight. This will be followed closely by the second machine in October 2025 and the final addition in January 2026. Two of these helicopters will be based in Christchurch and one on the West Coast.

Our Instrument Flight Rules (IFR) rollout and training have also advanced well. Following the successful launch of a new helipad in Cheviot, we're looking to replicate this in Fairlie, Methven,

Geraldine and Hanmer Springs. To accelerate pilot training, the Trust are supporting GCH Aviation with the purchase of a highly advanced flight and navigations procedures simulator to enhance the pilots' IFR and operational capabilities. This will make a huge difference, allowing pilots to replicate real-world conditions in a cost-effective and sustainable way.

Medical equipment purchases/upgrades have also been a priority. Thanks to a generous grant from Air Rescue & Community Services, we've recently added three Hamilton-T1 Ventilators to our fleet: two for the Christchurch-based Westpac Rescue Helicopters and one for the West Coast ROA Mining Rescue Helicopter.

WHILE WE STILL HAVE SOME GROUND TO COVER, WE REMAIN CONFIDENT THAT WE'LL REACH OUR TARGET BY THE END OF 2026 AS PLANNED.

Our plan for 2025 is underway with a target of \$600K

DONATIONS OF ANY SIZE ARE ALWAYS WELCOMED: [AIRRESCUE.CO.NZ/MISSION2026](https://airrescue.co.nz/mission2026)

ENHANCING FLIGHT CAPABILITIES:

Instrument Flight Rules (IFR)

Speed and access are critical to saving lives. When patients receive specialist medical care within the golden hour, the first hour after injury or illness onset, their chances of a full recovery can increase by up to 80%. Achieving this requires aeromedical helicopters that can operate in all conditions, ensuring timely delivery of lifesaving care.

Currently, two of our three rescue helicopters operate under Visual Flight Rules (VFR), where navigation relies on visual cues and the natural horizon. However, in low-lying cloud or adverse weather conditions, flights can be delayed or grounded, compromising the ability to retrieve and transport patients.

To overcome this, we are supporting the service operator, GCH Aviation, to implement Instrument Flight Rules (IFR) across the fleet. IFR enables helicopters to navigate using aircraft instrumentation alone, without needing external visual references. This transformative capability ensures our regional rescue service can operate safely and reliably in a broader range of weather conditions.

Why IFR is Critical

Studies around the world show that around 20-30% of flights could be impacted and unable to fly because the weather either at the air base or destination is out of the range for visual flight. Implementing IFR addresses these challenges and allows our rescue crews to operate when patients need them most.

Steps to Implement IFR

IFR implementation involves several key stages:

- Meeting regulatory requirements, including operator, aircraft, and pilot certification.
- Purchasing certified IFR-capable aircraft.
- Securing approval for IFR routes.
- Building and activating IFR helipads.
- Completing comprehensive pilot training and maintaining pilot currency.

IFR Route Rollout

IFR routes enable navigation between the helicopter base and IFR enabled helipads, they are essentially highways in the sky. Aircraft are required to fly at minimum safe altitudes of 1000 ft above non-mountainous terrain or 2000 ft above mountainous terrain. In collaboration with GCH Aviation and through the generous support of our community, IFR is now fully operational in Canterbury, allowing IFR flights between:

- Christchurch, Kaikoura, Timaru, Ashburton, and Twizel.

Plans are also underway to extend IFR capability to Hanmer Springs, Geraldine, Fairlie, Methven and the West Coast in the near future.

Pilot Training and Qualification

Helicopter rescue pilots must meet rigorous IFR training and qualification standards, including:

- **INITIAL IFR TRAINING:**
40 hours of IFR flight time, including
 - 10 hours of IFR operations with at least 10 take-offs and landings.
- **TOTAL FLIGHT HOURS:**
750 total flight hours, including:
 - 150 hours of cross-country flight time (50 hours under IFR).
 - 50 hours of actual or simulated instrument time.
 - 25 hours of night flight time.
- **EXAMINATIONS:**
Credits in IFR Navigation Aids, Law, and Navigation.

This year, the Trust has supported GCH Aviation with the costs of this advanced training, including travel to Dunedin for sessions on a Level D simulator, the gold standard for IFR flight training.

To maintain IFR currency, pilots must also complete a minimum of three IFR flight hours every three months.

The Impact

By introducing and fully rolling out IFR capability, we are overcoming weather-related barriers and ensuring the rescue helicopters can operate when they are needed most. This initiative represents a significant advancement in our mission for better patient care and outcomes.

Together, with the support of our community and partners, we are building a safer, more reliable rescue service - one that ensures every patient has the best chance of survival.

BUILDING PUBLIC TRUST:

Most Trusted Brand Award

In May, the Westpac Rescue Helicopter was honoured as the **MOST TRUSTED CHARITY** for the second time, having first received this accolade in 2018. Additionally, we were ranked as the third most trusted brand overall in the 2024 Reader's Digest survey.

The Reader's Digest Annual Trusted Brands Awards highlights the brands New Zealanders trust the most. Celebrating its 25th year in 2024, the survey gathered insights from 1,800 customers.

Four of New Zealand's rescue helicopter trusts proudly operate under the Westpac Rescue Helicopter brand: the Auckland Rescue Helicopter Trust, Waikato Westpac Rescue Helicopter, Life Flight (Wellington), and the Canterbury West Coast Air Rescue Trust.

This award reflects the deep confidence and unwavering support of the New Zealand public for our life-saving services, our principal sponsor Westpac, and the exceptional

crews who dedicate themselves to rescue missions every day.

Thank you to all who voted for us and continue to support us.

"They bring hospital closer for those who need it. Awesome charity that gives so much to NZ."

READER'S DIGEST SURVEY RESULTS

OUR COMMUNITY IN ACTION:

A Spotlight on Events

Across our region, individuals and groups have come together in remarkable ways to support our mission, proving that small actions can lead to extraordinary impact. From bake sales and charity runs to quiz nights and workplace challenges, these community-led events embody the spirit of generosity and innovation that fuels our work.

These initiatives are more than just fundraisers, they are a testament to the strength of our community and its commitment to helping others. Every dollar raised and every event hosted directly contributes to enhancing our services, enabling the rescue helicopters to save lives and support those in need. Here is just a small selection:

Westpac Gala Dinner & Auction: 28 August

In August, Westpac hosted their annual Chopper Gala and Charity Auction at the Christchurch Town Hall, and it was a sold-out success! Guests enjoyed a stunning sunrise-to-sunset-themed venue and were greeted with a special kapa haka performance by He Tiwai Mātauranga Heaton Normal Intermediate School, followed by a warm welcome from Westpac Chair, Pip Greenwood.

Miriama Kamo, a strong advocate for the service, steered us magnificently through the evening combining excellent entertainment with delicious food and wines. Thank you to sponsor ANZCO Foods for their support with the exceptional meat provided; New World for the lovely selection of New Zealand wines and all of our sponsors and guests who contributed in so many ways.

Together, we raised over \$160,000.

We were privileged to have amazing auction items from our supporters, such as the GCH Aviation private jet trip to Queenstown. Our rescue pilots and paramedics also helped to support the evening sharing their experiences with guests and talking about the work that they do each day. Brendan Daly and his wife Liz took to the stage with Intensive Care Paramedic Steve Pudney, to tell us about his life saving experience with the Westpac Rescue Helicopter.

The evening was filled with generosity, community spirit, and a shared commitment to making a difference. Thank you to everyone who supported this special event!

Moving for a Mission: The Back to Base Challenge

In August, we set an exciting challenge to walk, run, cycle, or ski a chosen distance in exchange for sponsorship. The goal? To get active, boost mental wellbeing, and raise funds to support the training and equipment needed for our three regional rescue helicopters.

A huge thank you to all our incredible supporters who participated! Thanks to your enthusiasm and dedication, we raised over \$45,000.

We were thrilled to see participants from across the region lace up their running and walking shoes, hitting the pool, riding their bikes, and diving into the challenge. The distances covered were truly inspiring, and it was fantastic to see everyone sharing their journeys online.

ROA Mining Fundraising Event by Rapid Relief Team: 7 December

Our incredible supporters at the Rapid Relief Team (RRT) hosted an event alongside the Greymouth Christmas Parade. Highlights included a helicopter fly-in and operational winch demonstration, captivating the crowd and showcasing the expertise of the ROA Mining Helicopter crew. The team was thrilled to play such a prominent role, sharing their vital work with the community.

Thanks to the generosity of the West Coast community and the dedication of RRT, an outstanding \$21,000 was raised! These funds will support the purchase of specialised medical

Rakaia Garden Fete: 21 November

The 2024 Garden Fete was a resounding success, bringing together locals and visitors for a day of fun, connection, and fundraising in aid of a life-saving cause. Held in the stunning setting of Sue and Ted Rollinson's homestead and botanic gardens in Dorie, Rakaia, the event featured over 100 market stalls, delicious food vendors and live entertainment.

The fete attracted families and visitors from across the region and together we raised an incredible \$23,000, with 100% of proceeds supporting the Canterbury West Coast Air Rescue Trust.

A special acknowledgment goes to Ted and Sue Rollinson for their longstanding generosity and dedication to the Trust's mission.

equipment for the West Coast crew. A sincere thank you to the West Coast community for your unwavering support and to RRT for your continued commitment to our mission.

Harnessing the Power of Community

It's a great day to pick some sunflowers!!

@thedeliciousmarketrvc

A LIFESAVING MILESTONE:

Cheviot Helipad Launch in September

In September, despite the challenging weather, the Cheviot community and the Westpac Rescue Helicopter team gathered to celebrate the official launch of the town's new helipad. This significant project, driven by the Cheviot Lions Club and supported by the collective goodwill of local residents and businesses, marks a major step forward in providing faster, safer emergency care for the region.

Chief Fire Officer, Chris Hill, and Cheviot Lions helipad fundraising committee chair, Giles Pinfold, spoke passionately about the power of community collaboration in bringing this project to life. Special thanks were extended to Air Rescue and Community Services (ARCS) and Kerry Varcoe of ADB Safegate for their invaluable contributions to funding and installing the helipad's automated lighting system, a key feature that will enhance nighttime and low-visibility operations, increasing accessibility and safety.

The Cheviot helipad is part of the MISSION 2026

Instrument Flight Rules initiative, a broader plan to improve emergency response capabilities across the region. Additional locations being considered for new or upgraded helipads include Hanmer Springs, Fairlie, Geraldine, and Methven.

This achievement is a powerful reminder of what can be accomplished through community, innovation, and dedication. Together, we're building a safer future for those who need it most.

TRANSFORMING LIVES THROUGH LEGACY GIVING:

How your Impact Can Last Beyond a Lifetime

Every rescue mission begins with a call for help. Whether it's a critically ill patient needing urgent transport or someone stranded in a remote location, the rescue helicopters take to the skies with a singular goal: saving lives. These missions are made possible thanks to the generosity and foresight of people who believe in making a lasting difference.

Among the many stories of generosity that shape the service, legacy gifts hold a special place. These heartfelt contributions, made through gifts in wills, form the foundation of our ability to respond to emergencies and be innovators in world class clinical care. They represent a powerful connection between generations - honouring the values of those who came before while ensuring future generations have access to help when it's needed most.

Legacy gifts go far beyond funding equipment, training, or operations; they create a ripple effect of hope and security.

Thanks to these extraordinary contributions, we've been able to invest in cutting-edge medical technology, enhance the skills of our highly trained crews, and ensure they are ready to respond to every call - any time, in most conditions.

For the families who have shared their stories with us, leaving a legacy gift is often deeply personal. It's a way to pay forward the care and compassion they have experienced or witnessed. It ensures the work continues for their loved ones, their neighbours, and their community.

If you've ever wondered about the impact one life can have, look no further than the legacies left by those who believe in our mission. Together, we carry their vision forward, touching lives and completing vital missions every day.

To those who have already included us in their wills, we extend our heartfelt gratitude.

Create Your Legacy

Creating your will is one of the most meaningful ways to protect your loved ones and ensure your wishes are carried out. With our free online will service, it's easier than ever to get started. In just a few simple steps, you can create a legally valid will from the comfort of your home, at no cost. Visit www.airrescue.co.nz/support-us/leave-a-legacy to begin.

If you already have a will in place and would like to include the Trust as a beneficiary, your legal advisor can make the small amendment. We can provide suggested wording for your bequest clause, or you can refer them directly to our website. We also have a printed brochure available upon request, just call us on **03 358 8244**, and we will happily send one to you.

Together, we can ensure the lifesaving legacy of our rescue missions endures for generations.

"I have chosen to leave a gift in my will because I know first hand the peace and safety these helicopters bring in life's darkest hours. Knowing that my legacy will help others when I am gone is deeply comforting. It's my way of saying 'thank you' and ensuring this incredible service continues for generations to come."

SUPPORTER, CANTERBURY

ENHANCING SKILLS TO SAVE LIVES:

Advanced Crew Training

Every mission undertaken by the Rescue Helicopter service depends on a skilled and highly trained crew. Whether responding to a medical emergency in a remote area, a motor vehicle accident, or a search-and-rescue operation, the crew's ability to act swiftly and decisively can make the difference between life and death. Behind each successful mission lies a rigorous commitment to training - a cornerstone of operational excellence that ensures the crew remain prepared for any situation.

Ongoing training is essential to maintain the crew's competence and confidence when they are

called out. By giving access to higher levels of training, along with the best equipment, we give patients the highest chance of positive outcomes.

Continuous Improvement in High-Stakes Situations

The environments in which our rescue crews operate are often unpredictable and unforgiving. From steep alpine terrain to turbulent ocean rescues, the scenarios demand more than just technical expertise. Crews must demonstrate seamless teamwork, adaptability, and sound decision-making under immense pressure.

To maintain this peak performance standard, our crews participate in regular

training exercises that simulate real-life emergencies.

This year, the crew have taken part in a number of training exercises and learning opportunities, all supported by the Trust:

1. BUSH & AVALANCHE

TRAINING: A comprehensive two-day training event that equipped the crew with vital survival and rescue skills.

Day 1 was held at Flock Hill Station; the focus was on bush survival and river awareness. The crew learned to build shelters, light fires, and craft stretchers and crutches using just rope. Day 2 took the crews to Mt Cheeseman and shifted the focus to avalanche terrain. Participants practiced using crampons for safe area

crossings, self-arresting with an ice axe in case of falls, constructing snow shelters, and locating avalanche victims with transceivers.

2. WATER WINCHING: This is a critical exercise that practices the deployment and retrieval of personnel and equipment using a winch system in open water. Ensuring precision, safety, and coordination, this training enables crews to respond effectively to emergencies such as floods, watercraft accidents, or stranded individuals. It is an essential skill for rescue teams operating in diverse and unpredictable conditions.

3. 2024 AEROMEDICAL CONFERENCE: This prestigious global event, hosted in Christchurch, unites professionals and experts

from around the world to exchange knowledge, explore innovation, and foster valuable connections. The Trust was proud to sponsor 20 delegates, enabling them to attend, gain insights, and bring back expertise to enhance our regional service.

4. AIRWAY TRAINING: Working with the ICU staff at Christchurch Hospital, the paramedics upskilled in managing and securing patients' airways in critical situations. This training focuses on techniques such as intubation, ventilation, and the use of advanced airway devices, to ensure patients can breathe effectively. Mastery of airway management is essential for providing high-quality care in the field.

A Lifeline for the Community

Investing in training is an investment in the safety of our community. The skills honed through these programmes directly contribute to the success of every mission, with outcomes that resonate far beyond the immediate rescue. Families are reunited, lives are saved, and communities are strengthened, all thanks to the dedication and expertise of the crew.

REST AND RESILIENCE:

Thank You Mitre 10 MEGA Greymouth

Rest quarters for the air rescue crews are essential for maintaining peak performance during demanding operations and long shifts. These dedicated spaces allow crew members to recover physically and mentally between missions, ensuring they remain alert and focused. Adequate rest improves decision-making, reaction times, and overall safety, especially during extended or high-stress emergencies, and is a vital part of ensuring the safety of crews and patients.

The Trust and the service operator, GCH Aviation, have worked with Mitre 10 Mega, Greymouth, to build some fabulous facilities in Greymouth that allow the crew to remain on base overnight as required. We are incredibly grateful for their help and support.

THE POWER OF TECHNOLOGY:

Saving Lives with Cutting- Edge Clinical Equipment

Thank you to Air Rescue & Community Services.

At the Canterbury and West Coast Air Rescue Trust, we know that every second counts. The ability to save lives depends not only on the skill of the paramedics but also on having the most advanced medical equipment at hand. Technology is the bridge between possibility and reality - helping patients receive the very best care when they need it most.

This year, thanks to the generous support of our donors, we've been able to invest in state-of-the-art equipment that makes a real difference:

- **3 X HAMILTON-T1 TRANSPORT VENTILATORS:** This is a fully featured Intensive Care Unit ventilator that provides critical breathing support in life-threatening emergencies, ensuring patients arrive stable and safe at the hospital.
- **4 X LUMIFY ULTRASOUND DEVICES:** Small portable and lightweight devices that enable the crew to assess and treat injuries quickly, even while en route, improving patient outcomes.
- **1 X CORPULS 3T MONITOR/DEFIBRILLATOR:** Modular in design, this piece of equipment allows real-time assessment of a patient's condition during every mission whilst delivering shocks from a safe distance.

These vital tools mean the crew can perform at their very best, delivering world-class care when it matters most. With your continued support, we can ensure our services remain equipped to meet the challenges of today and tomorrow. Together, we can save lives and change outcomes.

TV COVERAGE, SHARING STORIES THAT MATTER:

First Responders and Mt Hutt Rescue

This year, our extraordinary crew had the privilege of sharing their life-saving work with audiences across New Zealand through two captivating television programmes: First Responders and Mt Hutt Rescue. These series offer a rare, behind-the-scenes look at the dedication, expertise, and teamwork that fuel every mission, while shining a spotlight on the vital role our service plays in the community and the wider first response landscape.

FIRST RESPONDERS takes viewers into the fast-paced, high-stakes world of emergency services, where every second counts. The programme follows our skilled pilots and paramedics as they respond to critical incidents ranging from medical emergencies in remote locations to serious accidents requiring immediate intervention. Each episode captures the precise coordination and expert decision-making that define the service's operations, while sharing the powerful human stories behind every rescue.

In contrast, **MT HUTT RESCUE** focuses on the unique challenges of operating in one of New Zealand's most rugged and unpredictable environments. Crews navigate the changeable

weather to reach patients injured in skiing and snowboarding accidents in the mountains, as well as those who have become seriously unwell while out enjoying the snow.

We are immensely proud of the crew for opening up about their experiences and showcasing the impact of their work to a nationwide audience. These programmes have not only increased awareness of the critical challenges they encounter but also underscored the importance of the support we receive from our community.

In September we had the pleasure of welcoming **SEVEN SHARP** into the hangar, virtually at least. Pilot Brent Fredericksen chatted to Hayden and Wendy about the new H145 helicopters joining the fleet in 2025. He explained the benefits they will bring to the service, including the ability to fly in less favourable weather conditions. If you didn't catch it at the time you can still watch it on demand. You'll find a link in the news stories on our website.

To everyone who has tuned in, donated, or shared our story, thank you. Your generosity keeps our crews in the air and ready to respond when it matters most.

Grateful thanks

We are incredibly grateful to the many community groups, organisations and Trusts which choose to support the Rescue Helicopter service through their fundraising efforts. Your contributions to the service are invaluable in ensuring that we have ongoing support and funding to save more lives.

We also extend our thanks to individual members of our community and those who generously left us a gift in their will, one of the most impactful ways of supporting the Trust.
